

A balloon flight is a very serene experience in the air but it is an adventure. Your pilot will give you a safety briefing before take-off. For your own safety, please listen carefully.

## **AT THE TAKE-OFF AREA:**

While you are waiting at the take-off area, please stand clear of the balloon's basket (at least 5m) until the pilot gives you permission to get in.

## **LANDING:**

About 1 minute before landing, your pilot will advise you to take the landing position.

Turn facing the opposite direction of travel. Crouch down (ski position) with your back to the padding in your compartment and grab the handle in front. Please do NOT SIT. This will protect you during landing and ensures you do not fall forward. Please stay in this position until pilot gives you permission to stand.

Do not get out of the basket until instructed by your pilot.

**ENJOY YOUR TRIP!**
